2 November 1960

Major General David Wade  
Commanding General  
First Missile Division  
Vandenberg Air Force Base, California

Dear General Wade:

Your consideration for making possible the tour of the Vandenberg Air Force missile facilities by members of my staff on 17 and 18 October 1960 was greatly appreciated. The overall arrangements for accomodating the group, the excellent briefings by Major A. F. Druckery, the fine ground tour of the base with Major McKinney were highly spoken of by all members of the group and were most satisfactory and informative. The helicopter flight over the area, piloted by Captain Hughs, afforded all members of the group a fine opportunity to observe installations from the air and consolidate activities they had visited on the ground. A trip such as this, where facilities are viewed first hand, provides the group with background information on missile activity that can be achieved no other way.

For the members of the visiting group and myself, thank you and the members of your staff for the fine support which made possible a highly successful tour of Vandenberg Air Force Base.

Sincerely,

[Redacted Signature]
